

King Krimper™

Non-reversing ratchet style crimp tool

Instructions

1. Compress and release handles to open tool.
2. Insert KSC crimp style connector with conductors inside into the appropriate tool indent.
3. Squeeze tool handles until connector is completely compressed.

(Note: Tool will not release until connector is fully compressed; Use release (shown right) only when necessary for safety.)

4. Compress and release handles to draw out connector.
